

WRESTLERS MEET HARVARD TONIGHT IN HEMENWAY GYM

Engineers Are Greatly Improved Since Beginning of This Season

CRIMSON TEAM IS STRONG Burke Should Be Victorious in 175 Pound Class—Close Matches Expected

After the fine showing which they made against the Norwich team in their meet last Saturday, when they beat the cadets by a large margin, the Technology wrestling team enters the Harvard meet this evening with a strong backing to win. Ever since the first meet the Engineers have been showing improvement and a win over the crimson in wrestling would mean a lot to the team. Eight o'clock tonight is the time and the Hemenway gym at Harvard is the place.

This meet is the fourth meet of the season for both teams and both look to be about in the best form that they have reached so far this season. Harvard's previous meets have been with all formidable teams which stand high Columbia, Syracuse, and Springfield, in intercollegiate wrestling. In the Springfield meet the Harvard team completely eclipsed their opponents, winning every match.

Harris and Johnson Undeclared

In the 115 pound class, Technology will be represented by Cullen, the diminutive Sophomore, of whom great things are expected when he acquires more experience. Johnson, in the 125 pound class has won all his bouts, easily defeating his opponents in the four meets held this year. Rabinovitz demonstrated that he was the Institute's best entry in the 135-pound class when he beat Warburton by a decision in an elimination bout on Wednesday night.

Another undefeated man is Harris in the 145-pound class, who will work hard to keep his record intact against Harvard. Capt. Franks, in the 158-pound class has a clean slate except for the first bout which he lost to the Northeastern captain. Burke, New England intercollegiate champion made an auspicious debut against Norwich when he beat his man by a fall. Staebner, in the unlimited, has had lit.

(Continued on Page 4)

VIA PUBLICATIONS ANNOUNCE ELECTIONS

John W. Roper, Jr. G Is Editor
In Chief of VI-A News

Elections to the two Course VI-A papers for the coming term were held yesterday. Because of the alternate terms spent at the works, elections to the VI-A NEWS are held each term. Only a second term election is held for the year book Sparks, as business for other terms is handled by a Sparks committee, nominated by Hex-alpha.

Officers of the VI-A NEWS are: Editor-in-Chief, John W. Roper, Jr., G; Business Manager, Louis R. Taylor '26; Circulation Manager, Edward A. Leach '27; Undergraduate News Editor, Donald L. Ross '27; Special News Editor, Jack B. Peters '27; Alumni Editor, Thomas H. Darnell '27; Advertising Manager, Russell R. Smith '27.

Officers of Sparks are: General Manager, John W. Sanborn '26; Editor, Robert A. Williamson '26; Business Manager, Natalie Gada '26; Advertising Manager, Leo Teploy '26; Photographic Editor, George H. Rockwood, Jr. '26; Features Editor, Earle D. Lisner '26; Circulation Manager, Edward E. Mott '27; Assistant Advertising Manager, Richard Cutts, Jr. '27.

DETAILS FOR DORM DANCE COMPLETED

Arrangements for the Dorm Dance to be held Friday were completed when Mrs. L. F. Hamilton, Mrs. D. S. Tucker, and Mrs. C. E. Turner were announced as matrons for the affair. It will be an informal dance, the first to be held this term.

Morey Pearl and his nine piece jazz orchestra have been secured to play for the affair. The next dorm dance of the season after Friday's will be held the first part of March and will be formal.

Third of Quota Subscribed For 1926 Year Book

Original Watercolor Adds To
Technique Display in
Co-op Window

Technique has sold one third of its quota of 2000 signups during the first two days of the drive. In order to boost the campaign still further the year book placed the original watercolor, a copy of which is in this year's volume, in the window display of the Technology Branch. This watercolor is a painting of the court at the east end of building 1, done in full color and shows the court in mid-summer. Nelson Chase '17 is the artist and did the work in 1925.

No signups will be sold after one o'clock on Saturday at the present prices. The cost advances to \$2 at that time. The number of departments in the book depends to a large extent upon the number of subscriptions received, and it is upon the success of this campaign that the inclusion of some of the special features depends.

Work on Technique is progressing. Two-thirds of the advertising space has already been sold. Most of the Seniors have turned in their proofs for the Senior Portfolio. Considerable amount of copy has already been sent to the Andover Press, which will print the 1926 volume. The Andover Press has been chosen as the printers chiefly because of its fine work on the Harvard year book.

Plans For Naval Experimental Tank And Hydraulics Laboratory Complete

Tank Is Improvement Over The
One Now Situated At
Washington

Plans for the naval experimental tank, which will be built in connection with the new Hydraulics Laboratory, have been completed, and according to Professor James R. Jack, who is in charge of this part of the Laboratory, construction work could be started at once as far as the plans for the tank are concerned.

In addition to the experimental ship model tank, there are to be erected a hydraulics tank and a river tank, the plans for which are still under consideration by hydraulics experts. All three are to be housed in a building to be known as a Hydraulics Laboratory, which will probably be situated directly across Massachusetts Avenue from the Institute.

The ship model tank is to be constructed of concrete, measuring 500 feet in length by 20 feet wide and 10 feet deep. Fifty feet extra at each end will be shallow water where the accelerating of the models will be done. The rails for the propelling truck will be supported either by cantilever beams or by rods hung from the roof braces and as it is desired to obtain a speed of 30 miles per hour from rest in a length of 50 feet the truck will be much lighter than the

FRATERNITY TUNES TO BE IN SONG BOOK

Song Book Committee Decides
On Contents of Volume

Each fraternity at Technology will have a song in the proposed Technology Song Book, it was announced at the meeting of the song book committee Friday. The plan has been approved by the Interfraternity Council and several houses have already sent in their contributions to the book.

There will be about twenty-five Technology numbers including some recent Tech Show successes. In addition it will contain three of O. B. Denison's hits.

Favorites of other colleges will also appear in the book. Many of the well known college songs of Harvard, Yale, Dartmouth, Wesleyan, and other institutions will be used. In addition a group of old time favorites will be printed, including "The Road to Mandalay" and "Honey That I Loved so Well."

Although bids have not yet been received for printing the book, it is expected that the new publication will be out before Commencement. The Alumni are now being canvassed to see what demand there will be among them for it.

ALUMNI NOMINEES FOR NEW FISCAL YEAR ARE NAMED

Ballots Will Be Sent Out On
March 20—Polls Will
Close April 20

LEE '92 FOR PRESIDENT

Henry F. Bryant '87 Nominated
For Vice President of
Association

Nominations for officers of the Alumni Association for the fiscal year that begins July 1 were announced Monday by Orville B. Denison '11, Secretary-Treasurer of the Association. Ballots for the annual election will be sent out on March 20 and the polls will close April 20.

Elisha Lee '92, nominee for the presidency, is vice-president in charge of operations of the Pennsylvania Railroad. He graduated from the Institute as a civil engineer in 1892 and has been connected with the Pennsylvania Railroad since graduation except for two years, 1909-1911, when Superintendent of the New York, Philadelphia, and Norfolk Railroad. From 1917 to 1922 he served as a term member of the Corporation.

Tufts to Uphold League in Debate Here Next Friday

"Resolved; that the United States should enter the League of Nations" is the subject of Friday evening's debate with Tufts College which is to be held in room 5-330 at eight o'clock. Tufts will uphold the affirmative while Technology will support the negative side of the question.

As part of the preparation for this debate, the Technology team, under the direction of Mr. Dean M. Fuller, will hold a practice meet this afternoon at three o'clock in room 2-190, which will be open to anyone interested.

Professor Harry W. Tyler '84 is to act as chairman of the debate Friday, while the judges will be Mr. William H. Best, Mr. Floyd E. Williamson, and Mr. Martin P. Harney.

The Tufts team is composed of the following men: James E. Nickerson '27, Francis H. Russell '26, and Clarence A. Roberts '26. Nickerson is the President of his class, while Roberts is the President of the Tufts Debating Council. Capt. John W. W. Sullivan G., Howard H. Burt '29, and James C. Evans G., will uphold the negative of the question for the Institute.

PHYSICISTS HEAR RUSSIAN SPEAKER

Professor Joffe Addresses The
Physics Colloquium
In Room 4-231

Professor A. Joffé, Head of the Department of Physics of the University of Leningrad, Russia, was the speaker Monday and yesterday on "The Elastic Properties of Crystals" and "The Passage of Electricity Through Crystals" in room 4-231.

In discussing the elastic properties of crystals, Professor Joffé gave an account of his work in this field during a period of twenty years. He stated briefly the problems that were encountered and connected Born's theory of crystal lattices with experimental results of rupture tests on crystalline materials.

In the discussion of the passage of electricity through crystals yesterday afternoon, the agreement with Ohm's law when crystalline substances are polarized with high voltages was shown. The mechanism of conductivity was shown to be mostly electrolytic and proof of Faraday's law to one half per cent accuracy was made. The most striking property of crystals is the high voltage of polarization concentrated in a very thin layer of about one wave length of light. Some of the practical applications of these facts derived are useful in the production of insulators, condensers and accumulators.

Hockey Team to Play Dartmouth Today; Oppose Terriers Tomorrow

With hopes of a victory over Dartmouth's far-famed hockey team, the Technology squad left for Hanover Tuesday evening. The Big Green boasts one of the most formidable college teams in the United States. This game will be the acid test for the Cambridge sextet's chances of victory in the coming Windsor Cup series, which starts tomorrow evening at the Boston Arena.

Dartmouth, at the present time, is at top form. The Hanover men have had only one serious set back this year, and that occurred when the Toronto team trounced them 10-1. This does not count heavily against them however when it is realized that the Canadian collegians are the peer of any and every University team in the world.

"Merry Milkmen" Strong

On Saturday, Williams was crushed 4-1 by Dartmouth, in a manner that left no doubt as to which was the better team. Williams is not a weak team either, having beaten Yale earlier in the season. Two players stand out as stars in the Green ranks, Fryberger and Lane. These two have been most consistent point scorers on the team. They work together in perfect harmony and each packs a

very hard shot. Anthony at goal is another who has been responsible for opponents low scores.

B. U. Game Tomorrow Evening

Technology will put its strongest squad on the ice. Brooks and Weissner will play the wing positions, with Nock and Freeman as substitutes. Randall, who is one of the hardest workers and fastest players of the "Merry Milkmen," will start at center. Berkeley and Crandall, an exceptionally strong pair on both offense and defense, will be at the defense positions. Bill Richards will guard the cage.

Immediately after the Dartmouth match, the Engineers will hasten back to Boston where, on tomorrow evening they match their skill for the third time this year with the B. U. Terriers. This game will either make or break the Boston team in the Windsor Cup Series. They have already lost to the Boston College Eagles by a 2-1 score in the first round and should they drop tomorrow's game their chances of gaining the coveted trophy would be very slight.

Tech Team Confident

Boston University is enjoying the most successful hockey season in its history. They have been defeated but (Continued on Page 3)

LARGE AUDIENCE ARTHUR WHITING HEARS MUSIC BY

First Concert of Series Given
In Room 10-250 Last
Evening

LECTURE PRECEDES MUSIC

Speaks of Engineer's Need For
Some Kind Of
Avocation

Appearing before an audience of nearly 400, Mr. Arthur Whiting gave his first lecture-concert last evening in room 10-250. The program consisted of a talk by Mr. Whiting and numbers on the piano, violin and cello by himself, Mr. Wolfe Wolfinsohn, and Mr. Emmeran Stoeber, respectively.

"The audience which I am addressing is probably made up of men who are fiercely professional," said Mr. Whiting in the introductory part of his talk. "You differ from the students at Harvard, Yale and Princeton, before whom I have appeared for several years, in that you are loaded and aimed, while there most of them are loaded but not aimed."

He then spoke of the danger of one-sidedness and advised the taking up of an avocation, preferably while in college, so that the mind might be broadened rather than kept in the narrow channels of professionalism. "The best mind is the cultivated mind. It can't be bought, it has to be grown."

Appreciation of Music Needed

An appreciation of music was spoken of as one of the best means for cultivating the mind. "One can become a good critic, a music lover, merely by listening. It is not necessary in these days to play an instrument."

After explaining about the different periods in musical history and giving a short analysis of the selections to be rendered, Mr. Whiting introduced Mr. Wolfe Wolfinsohn, who played a number on the violin. Mr. Emmeran Stoeber then played the cello, and this was followed by some selections on the piano by Mr. Whiting himself. A trio of violin, cello and piano completed the program.

STUDENT PASTOR TO TALK TOMORROW

Topic Is "Religious Subjects
Students Are Discussing"

Rev. Merchant S. Bush, Presbyterian Student Pastor of Greater Boston, has been secured as the speaker at the Thursday 12:30 o'clock religious meeting to be conducted tomorrow during the noon hour in East Lounge, Walker. The subject chosen is "Religious Subjects Students Are Discussing." Rev. Bush is well known throughout the country, having delivered sermons and addresses in most large cities and is very popular with the student class which he serves.

John Willis '26, President of the T. C. A., will preside at the meeting, which is one of the series being conducted by that organization weekly throughout the term. No attempt has been made to make the meetings missionary, but they are intended to provide an outlet for religious feeling existing at the Institute.

CALENDAR

Wednesday, February 17

3:00—Varsity Debating Practice, room 2-190.
4:30—High School Teacher's Lecture, by Professor Mueller, room 10-275.
5:00—Prom Committee Meeting, Walker Committee Room.
5:00—M. E. Society Board Meeting, room 3-312.
7:00—Alpha Chi Sigma Smoker, Walker Faculty Room.
7:15—Meeting of Greater Boston Civil Engineering Societies, Chipman Hall, Tremont Temple.

Thursday, February 18

12:30—Religious Meeting conducted by T. C. A., East Lounge, Walker.
1:00—Freshman Practice Debate, room 2-190.
5:00—Outing Club meeting, Faculty Dining Room.
8:00—Menorah Society, Joint Meeting with Radcliffe, North Hall.

Friday, February 19

7:00—Belgian Student's Dinner Meeting, North Hall, Walker.
8:00—Informal Dorm Dance, Main Hall, Walker.
8:00—Debate with Tufts on the League of Nations, room 5-330.

Saturday, February 20

4:00—Interfraternity Council Tea Dance, Fraternities Club.

"LACK OF FUNDS"

HANDICAPPED by a lack of funds, the Athletic Association was forced to decline an invitation from the Interscholastic rowing Association, asking that the Technology crews be entered in the annual crew regatta at Poughkeepsie in June. This is the second time that the A. A. has been forced to transmit its regrets to the national crew organizations, and both times one of the principal reasons was the same—"lack of funds." The announcement brings to light the state of affairs in the other branches of sport, all appear to have much less money than they need to carry on their work.

It is unfortunate that such a condition exists, partly because of its effect on the morale of individual team members and partly because of its detrimental effect on the reputation of the Institute in other colleges. In athletics here, stress has never been placed on the development of winning teams and championship competitors to the exclusion of "athletics for every student." We are recognized all over this country as exponents of a conservative and sane athletic policy, a policy that is determined by student opinion rather than that of clamoring Alumni, interested in producing a winning team at any cost. Much stress is placed on good sportsmanship and the spirit of "playing the game for the sake of the game." But no team can expect to do its best work and derive the maximum of benefit therefrom without an occasional competition. The lure of competition with other strong teams and the rewards of victory in a meet of national importance is no small factor in maintaining morale. It is like being "all dressed up, with no place to go." Dressing is an interesting diversion and one acquires some skill in performing the operation, but the most benefit is derived from going somewhere.

As we said before, we suspect that crew is not the only sport that is suffering from financial hardship. We propose to look into the other sports to see if a lack of funds has handicapped them.

THOU SHALT NOT

"Because of an editorial condemning play censorship as exercised by the local board of censors, Tom H. Johnson was dismissed from his position as editor of the *Daily Lariat*, Baylor University, Waco, Texas."—News item in "The New Student."

AGAIN the question of the value of censorship of dramatic productions is raised, this time by a student editor. And, as is too frequently the case when a student editor questions the wisdom of powers above him, the critic is the one who suffers.

Wherever there is censorship, there arises a question first as to the justice of the censorship and secondly of the worth of the institution itself. In France the question was solved about a quarter of a century ago by abolishing all censorship of the stage; in England the fight against the licensing of plays by the Lord Chancellor has been going on with particular bitterness since the beginning of the century. Even Mr. Casey has come in for a rather large share of adverse criticism as a subversive influence on Boston drama.

Bernard Shaw, in his preface to a volume of Brieux plays, declares that it is not the censor who is so much at fault as the practice of censorship: that it is the office, and not the man who is to blame. He has stated that it is ridiculous that "Camille," which Sarah Bernhardt made famous, should be played everywhere while his own sociological study, "Mrs. Warren's Profession," was forbidden production, but that a censor could do nothing else in order to have an excuse for his office.

Obliging the choruses of musical comedies, revues, and burlesques to wear sufficient clothing to be seen, and restricting the type of jokes that such shows and vaudeville shows may use does no particular harm, save that it keeps people to some extent from going to such shows. (They have no intellectual appeal, and the removal of pornographic features leaves only the aesthetic appeal which most people cannot appreciate). But ruining a play of merit in order to prevent a casual reference to sex, destroying the literary quality of a much discussed play (as was done in Boston with "What Price Glory") in order to remove features that it might not be well for children six or eight years old to hear, but which could not possibly harm adults—such practices, the almost inevitable accompaniment of dramatic censorship, are what have turned the intellectual set against the practice.

It is worth noting that the particular play the forbidding of the production of which aroused the ire of the editor of "The Lariat" was "White Cargo." Those who saw the Boston version of it may judge for themselves how subversive of morals this interesting psychological study may be.

40 Years Ago This Week

The well-drilled warriors in the opera Lohengrin which have been praised in the greater Boston newspapers were none other than a group of Technology Sophomores whose prowess was the result of long hours of Military Science.

25 Years Ago This Week

The Electrical Engineering Society has planned many trips for this term. The interesting trip to the Boston Electric Light Company was the first of a number which will cover the principal plants within reach of Boston.

The Institute will be represented by two of the faculty in the expedition to the Orient to study the total eclipse of the sun next May.

10 Years Ago This Week

Almost two hundred students were present at a meeting to organize an Engineer Corps for the R. O. T. C. The speakers emphasized that this was to be a students organization for the furtherance of one of the most necessary branches of the service. The Chemical Society held the largest professional society meeting in the history of the Institute, when over two hundred attended a discussion of the oddities of chemists by Prof. Smith.

Intercollegiates

According to the Michigan Alumnus, Professor Shull of the University of Michigan has discovered the reason behind the fact that college men and women do not marry as often as other people. This is what he finds: "Women in general choose to marry men who are their superiors; but for college women there are no such men; hence they rarely marry. The case for men is almost the same, for men as a class choose to marry women who are somewhat inferior to themselves; but as college men can find no such women, they do not often marry."

Carlos F. Stoddard, Jr., the retiring editor of the Yale Daily News, leaves behind him an editorial summing up his attitude toward prohibition. This signed editorial was entitled, "One last shot" and said, among other things, "whereas Americans used to flock to Europe as a tribute to a civilization which we have not attained, we now flood the continent with a disgraceful, thirsty crew that makes the name of America ridiculous in European eyes." And in another place, "It would be ridiculous for Americans to go to church because they had to; it is equally ridiculous to look for good in a man's not drinking because he cannot."

Prof. Miles of the psychology department of the University of California has recently published the preliminary results of an experiment consisting of a photographic record of the eye movements in the reading of Chinese. The object of the experiment was to determine whether Chinese, which is printed in a vertical axis, is read with the same type of eye movements as English. It was definitely proved that Chinese although more compact is read with the same eye movement and that the vertical arrangement is slightly more efficient than the horizontal.

TRACK TEAM TO MEET TERRIERS

Premier Dual Indoor Meet For Coach Hedlund's Men

Boston University's fast track team will furnish the competition for Technology's runners on the board track and in the hangar gym this Saturday afternoon at 2:30 o'clock. Coach Hedlund's men are primed for breaking some of the board records in their first dual meet of the season. As this is the first time in three years that

the Varsity squad has attempted an indoor meet, it will be an interesting innovation.

George Leness, captain of the team and one of the best middle distance runners in the country, will be on hand for the 600, which is his pet distance. If George is in as good form as he was in the K. of C. Games he will not only smash the board record but in all probability will put it where it will remain out of reach for a while. Cy Meagher, who has been doing some great running as leadoff man for the relay team, will also be entered in the 600.

Steinbrenner Entered in Hurdles

According to Coach Hedlund, Pete Kirwin, the cross country star, is expected to show his heels to B. U.'s entrants in the 1000 yard race. Eddie Chute, who captured second in the 1000 at the B. A. A.'s is entered in the mile along with Bill Rooney, and this pair should make a creditable showing. Jack Wiebe and K. E. Smith in the 40 yard sprint and Saul Brodsky in the shot put are also depended upon to garner their share of the points.

Hank Steinbrenner and Tom Guerin, who was ineligible last year, will display their speed in the 45 yard hurdles. Steinbrenner and Guerin are well matched and it is an even bet as to which one of them will be the first to cross the finish line.

Little is known as to whom Boston University will enter, but Coach Burns is expected to use all five members of his crack relay team. This team, which is composed of Fred Onthank, Leon Campbell, Tom Hearne, George Mastaglio, and Henry Cullen is a fast outfit. With the exception of Campbell, the Terriers' relay squad consists entirely of veterans, each of whom is fast enough to make the best of the Tech. men none too sure of winning.

FROSH JOURNEY TO ANDOVER TONIGHT

This afternoon the Cardinal and Gray frosh basketball team, under the direction of Berny Morgan, will journey to Andover to match up with the Prep School five. Captain Brockelman, who has been out of the game for a little, is back with his mates which boosts the stock of the yearlings considerably. Brockelman was one of the main cogs of the frosh this season and his return to the game gives the frosh a good chance of winning.

This game will give local sport followers a good line on the Harvard frosh game which takes place March 6. The Harvard frosh and Andover were evenly matched, the prep school lads emerging victorious by a scant one point. Saturday, the Exeter quintet will play host to the Engineer five in the former's court.

HOCKEY TEAM PLAYS DARTMOUTH AND B.U.

(Continued from Page 1)

four times in eleven starts, losing to the Nicholas A. C. of New York, the Saint Nicholas team of the United States Amateur Hockey League, Boston College, and Technology. The first two of these teams were of course far superior to the Terriers since they are in more advanced leagues, and have older and better players. The Boston College defeat was only brought about in the last few minutes of play in a closely contested game when Ed Mallowney, the fleet wing of the Eagles sent one into the net for the winning tally. The Technology defeat evened the score between these two teams, the Boston boys having triumphed in the first engagement.

Thursday's game should be a classic. Both teams are keyed up to a high pitch of excitement and each is confident of victory. It will be remembered that in the last meeting of these two traditional rivals, feeling ran high and the play, hard and fast. Both individual play and excellent teamwork featured the evening.

FROSH SWIMMERS TO MEET CANTABS TODAY

Cambridge High and Latin school swimming team will meet the Technology freshmen this afternoon at 3:30 over in the Cambridge Y. M. C. A. pool. Although the freshmen were defeated on Saturday, they showed improvement over their previous meets and bid fair to make things interesting for the Cantabs.

This is the only meet which the frosh swimmers will have in the Cambridge pool, the remainder of their

matches being held on foreign waters. Taking comparative scores as a basis for getting a line on the respective strengths of the two teams, the meet should be close.

agree, however, that in its columns they find a combination of all these things and consequently one of the best newspapers of today.

MAKERS OF POWDERS SINCE 1802

The oldest du Pont powder mill—built in 1802

Leadership

Leadership is measured by service.

For nearly a century and a quarter, the du Pont name has signified leadership in explosives manufacture on this continent.

Paralleling the rapid growth of American industry, du Pont has developed explosives to meet new needs and solve new problems that industry might be served.

Thus has it been the privilege of du Pont to contribute a share in the industrial expansion of the Republic.

the experience, but showed promises by throwing his Norwich opponent in less than five minutes.
The Harvard and Technology freshman teams will attempt to break the 13 to 13 deadlock in which the last meet resulted, when they compete as a preliminary to the Varsity contest.

NEW LOCATION

Although thoroughly beaten against Andover, the Technology frosh expect to win against Harvard.
Ross, Capt. Burke, and Bacon, who defeated their Harvard opponents last time, are all in good condition and in addition a new man Kimmel, has replaced Dickenson in the 125-pound class. That the freshmen are still woefully weak in the heavy classes was well illustrated against Andover, when Bacon, who weighs only 150 pounds, wrestled in both the 158 and 175 pound divisions.

NOTICES

NEW YORK BOSTON CHICAGO

When it's a rainy
night—and with three crafty
bridge players your luck
is running wild
—have a Camel!

When hoop skirts and the Virginia Reel were in vogue, and loving hands at home fashioned Grandfather's homespun for the prom... even in those days, Anheuser-Busch was nationally known to good fellows.
And today... when feminine heads are bobbed and shingled, and we dance the Charleston in expensively tailored clothes to the stirring strains of a jazz orchestra...

BUSCH
(A-B)
PALE DRY
Ginger Ale

is the favored drink of college men because, like the college man, Busch Pale Dry is a good mixer everywhere and every time.

ANHEUSER-BUSCH ST. LOUIS
S. S. PIERCE CO.

Camels represent the utmost in cigarette quality. The choicest of Turkish and Domestic tobaccos are blended into Camels by master blenders and the finest of French cigarette paper is made especially for them. Into this one brand is concentrated all of the knowledge, all of the skill of the world's largest organization of expert tobacco men.

WHEN the dark skies are pouring rain outside. And fickle fate deals you hands at bridge that you play with consummate skill—have a Camel!

For Camel is the silent partner that helps every deserving player win his game. Camels never hurt or tire the taste, never leave a trace of cigarette after-taste. Regardless of the gold you spend, you'll never get choicer tobaccos than those rolled into Camels.

So this evening as you ply your unerring skill, evoke then the mellowest fragrance that ever came from a cigarette.

Have a Camel!

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price.
